Santiago Fernández

Data & AI Engineer

Madrid, Spain · santifdezseo@gmail.com · sfseoane.es · linkedin.com/in/santifdezseo

PROFILE

Data and AI engineer with production experience: RAG systems, ETL pipelines orchestrated with Airflow and vision models, on projects for clients across several sectors, including a multinational client. Founder of Makineo, a live platform with over 1,000 published experiences. I work in Python, SQL and TypeScript and own the whole solution: prior research, infrastructure and compliance.

PROFESSIONAL EXPERIENCE

Data Engineer, *Qaleon Solutions · AI Consulting, Madrid* 2025 – Present

- Multi-project role delivering solutions across several sectors, including a multinational client: 30,000+ documents and 20M+ data records processed.
- Built RAG systems (LangChain, FAISS), ETL pipelines orchestrated with Airflow, vision models for detection and classification, and sentiment analysis.
- Owned the prior research and the sourcing of the resources each solution needs; supported and maintained the infrastructure (Docker, production environments) and ISO 27001 compliance.
- Database query optimisation and direct collaboration with clients.

Founder, *Makineo · Electronic music platform in Spain* June 2025 – Present

- Full-stack platform for the Spanish electronic music scene with 1,000+ published experiences, a custom admin panel and a native mobile app.
- Nuxt, Vue, TypeScript, FastAPI, PostgreSQL, Capacitor and end-to-end tests with Playwright.

Quality Assurance (internship), *Merlin Software* April – June 2024

- Automated tests with Cypress, Karate, JMeter and Appium; streamlined testing flows and real-time incident reporting.

Internal Support, *Qindel Group* March – September 2021

- Incident handling; updated and configured 100+ servers for the University of A Coruña and integrated them into a new monitoring system.

PROJECTS

Punch (punch.sfseoane.es). UI/UX reviewer: measures SEO, accessibility and Web Vitals in a real browser, and a vision model annotates the screenshot. FastAPI, Nuxt, PostgreSQL, Playwright.

CuadroScan (cuadroscan.sfseoane.es). From a photo of an electrical panel to a Spanish REBT compliance review: the AI only reads, a deterministic rules engine decides and cites the article. FastAPI.

UFC Data Pipeline. ETL over 3,600+ events and 1,500+ fighters with 50+ features per fighter for a classification model. Python, Scikit-learn, PostgreSQL.

EDUCATION

Specialisation course in Artificial Intelligence and Big Data, *IES Fernando Wirtz* 2024 – 2025

Higher Technical Diploma in Cross-Platform Application Development, *CPR Afundación Abanca* 2022 – 2024

Intermediate Diploma in Microcomputer Systems and Networks, *IES Fernando Wirtz* 2020 – 2021

TECHNICAL SKILLS

Languages and data: Python (Pandas, NumPy, Scikit-learn), SQL, TypeScript; PostgreSQL, MySQL, MongoDB, Redis.

AI and ML: RAG (LangChain, FAISS, Ollama), computer vision, predictive modelling, regression, classification, convolutional networks.

Data and infrastructure: Apache Airflow, Apache NiFi, Spark, Kafka, Docker; scraping with Requests, BeautifulSoup and Selenium.

Quality and visualisation: Cypress, Karate, JMeter, Appium, Playwright; Power BI, Matplotlib, Seaborn. Scrum and Agile.
